

Project:

Hiawatha Reserve, Potable Water Tank

Completion Date:

September 18, 2021

Description:

The project was to provide an ANSI/NSF 61 certified protective polyurea coating to an underground potable water tank on the Hiawatha reserve in Keene, ON. This drinking water was for a daycare and was subject to strict regulatory requirements. Nukote EP Prime II @ 5 mils, and Nukote ST-PW @ 85 mils was applied to the properly prepared substrate. Arcadis was the engineering firm that oversaw the project.
