

**Project:**

York Culvert Rehabilitation (Woodbine)

**System:**

Nukote ST

Nukote PP300

**Description:**

The client wanted to structurally rehabilitate multiple submerged CSP culverts with active traffic on a highway above. This project involved structural spray lining of multiple CSP culverts running underneath a highway. The diameter of the culverts was 1.2 meters. The culverts were successfully lined with Nukote ST and PP300 using Nukote Robotics
